

We can supply your flagpole needs from 15' to 100' in aluminum, fiberglass and steel. In addition to the traditional ground set poles we have wall mount and shoe base options. Satin finish is the most common however bronze, black, white and more are also available. A stainless steel winch system is available as well as the cam action cleat for an internal halyard system. Some of the most popular sizes of flagpoles follow with pricing and other details.

INSTALLATION IS ADDITIONAL – PLEASE CALL FOR A QUOTE!

GROUND SET ALUMINUM FLAGPOLES

The specifications below indicate the height of the pole and the base diameter, top diameter and wall thickness of the pole.

RESIDENTIAL SECTIONAL

A cost effective alternative for the home, these flagpoles consist of 5', 2" diameter silver anodized sections which swedge together providing a smooth exterior finish. Standard fittings include spun aluminum gold ball, cast aluminum truck, halyard, nylon snaps, cleat and ground sleeve.

S15	15'	\$ 140.00
S20	20'	\$ 162.00

RESIDENTIAL ONE-PIECE

Designed primarily for residential use, these poles are also suitable for any application including apartment complexes, churches, restaurants and recreational facilities. Prices are for an external halyard system and a satin finish. Standard fittings include spun aluminum gold ball, cast aluminum cap style truck, halyard, nylon snaps, cast aluminum cleat, foundation sleeve and spun aluminum flash collar.

R15	15' – 3"x2"x.125	\$ 525.00
R20	20' – 3"x2"x.125	\$ 605.00
R20A	20' – 3.5"x2.4"x.125	\$ 740.00
R25	25' – 3"x2"x.125	\$ 665.00
R25A	25' – 3.5"x2.4"x.125	\$ 820.00
R30	30' – 4"x2"x.125	\$ 960.00

COMMERCIAL

When price is a factor and quality is a must these poles offer an outstanding value. Prices are for a satin finish. External halyard fittings include spun aluminum ball, cast aluminum revolving truck, halyard, bronze snaps, cast aluminum cleat, foundation sleeve and spun aluminum flash collar. Locating the halyard and cam cleat inside the flagpole shaft provides additional security and increased aesthetics. The cam cleat locking mechanism used to raise and lower the flag is only accessible through a keyed access door. Internal halyard fittings include spun aluminum ball, cast aluminum stationery truck, halyard with retainer ring, counterweight and snaps, cam action cleat, foundation sleeve and spun aluminum flash collar.

		EXTERNAL HALYARD	INTERNAL HALYARD
C20	20' – 5"x3"x.125	\$ 1040.00	\$ 1195.00
C25	25' – 5"x3"x.125	\$ 1080.00	\$ 1255.00
C30	30' – 5"x3"x.125	\$ 1255.00	\$ 1415.00
C35	35' – 5"x3"x.156	\$ 1615.00	\$ 1845.00
C40	40' – 7"x3.5"x.156	\$ 2765.00	\$ 2910.00

COMMERCIAL EXTRA

When extra strength is required these poles are the perfect choice. Prices are for a satin finish. External halyard fittings include spun aluminum ball, cast aluminum revolving truck, halyard, bronze snaps, cast aluminum cleat, foundation sleeve and spun aluminum flash collar. Locating the halyard and cam cleat inside the flagpole shaft provides additional security and increased aesthetics. The cam cleat locking mechanism used to raise and lower the flag is only accessible through a keyed access door. Internal halyard fittings include spun aluminum ball, cast aluminum stationery truck, halyard with retainer ring, counterweight and snaps, cam action cleat, foundation sleeve and spun aluminum flash collar.
